PROFESSIONAL SUMMARY

Full stack .NET developer with 2.9+ years building and maintaining production web applications. Strong on the backend with C#, ASP.NET, and .NET Core, and on the frontend with Angular or React, TypeScript, backed by SQL Server and MySQL. Currently a developer at Amnex Infotechnologies, a smart-city product company, working on planning and scheduling systems for public transport. Earlier work covers booking, gift card, and invoicing systems, frontend performance work on a large U.S. government application, and integrating OpenAI and Claude APIs into production workflows.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL

Frameworks & Libraries: .NET Framework, ASP.NET, .NET Core, MVC, Angular, React, Redux, jQuery, AJAX

Databases: MS SQL Server, MySQL, stored procedures, query optimization

AI / LLM: OpenAI API, MCP Server

Tools & Platforms: Git, GitHub, Bitbucket, Jira, Azure, AWS, Docker, Kafka release support

PROFESSIONAL EXPERIENCE

Amnex Infotechnologies Pvt. Ltd. — Software Developer (.NET + React/Angular) **Aug 2026 – Present**

Ahmedabad, Gujarat • Product company — smart city, mobility & intelligent transport systems (ITS)

- Build features for the Planning & Scheduling (PNS) platform used by New Mumbai Municipal Transport (NMMT), covering schedules, trips, duties, vehicle assignment, and dispatch, with an Angular frontend and a .Net Core backend.
- Developing the Turn-In / Turn-Out Report module, mapping the underlying database tables, functions, and data relationships so operational reporting stays accurate for daily transport scheduling.
- Work across two government transport projects (NMMT, ASTC and AGL), handling Angular frontend and Node.js API changes while coming up to speed on a large, in-production government codebase.

CodeQuantum Technologies Pvt. Ltd. — Software Developer (.NET + React) **May 2024 – May 2026**

Ahmedabad, Gujarat • Contract-based company • Client project: Tyler Technologies, USA

- Built a booking and scheduling system from the ground up — React frontend, .NET Core Web API backend — covering availability, reservations, confirmations, and cancellation handling.
- Developed a gift card module (issuance, balance tracking, partial redemption, expiry rules) and invoicing features including invoice generation, tax calculation, payment status tracking, and PDF export.
- Integrated OpenAI and Claude APIs into existing workflows for content generation, smarter search, and AI-assisted data processing, and set up an MCP server to connect these tools to internal systems.
- Led frontend development of a U.S. government web application (client: Tyler Technologies) in React, Redux, and TypeScript, improving load performance by around 40% for 10,000+ users through code splitting, lazy loading, and a responsive redesign.

AdiInfi Pvt. Ltd. — .NET + React Intern **Nov 2023 – Apr 2024**

Ahmedabad, Gujarat

- Developed and maintained web applications and business features using C#, .NET Framework, .NET Core, ASP.NET, and Angular/React.
- Wrote and tuned SQL queries, stored procedures, and functions in MS SQL Server to support application features and data operations.

PROJECTS

ProAttend — HR Attendance & Leave Management System | *React, TypeScript, Node.js, Express*

- Attendance and leave system with six user roles, daily punch in/out, monthly calendars, and multi-level leave approvals; Express + TypeScript REST API with Prisma, JWT auth, and bcrypt, plus HR/admin screens for employees, shifts, holidays, and CSV/Excel reports.

MobileBitz — Mobile Shop Management System | *Angular, TypeScript, Vite, Tailwind, Node.js, Express, Prisma*

- Mobile-shop website with an admin side (stock, brands, banners, offers, inquiries) and a customer side to browse and filter phones and reach out over WhatsApp; live on Vercel/Render with Cloudinary images and responsive across phone and desktop.

EDUCATION

Gandhinagar Institute of Technology — B.E. in Information Technology **Aug 2020 – May 2024**

Gandhinagar, Gujarat
